Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12 and 18, drawn to a device comprising an electron donor and acceptor structures wherein the electron acceptor structure containing at least one type of tubular nanostructure having at least one complexed or adsorbed pigment on its surface.

Group II, claim(s) 13-17, drawn to a process for manufacturing a device comprising an electron donor and acceptor structures wherein the electron acceptor structure containing at least one type of tubular nanostructure having at least one complexed or adsorbed pigment on its surface.

Group III, claim(s) 19-20, drawn to a method of producing electricity using a device comprising an electron donor and acceptor structures wherein the electron acceptor structure containing at least one type of tubular nanostructure having at least one complexed or adsorbed pigment on its surface.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature between the groups is a device comprising an electron donor and acceptor structures wherein the electron acceptor structure containing at least one type of tubular nanostructure having at least one complexed or adsorbed pigment on its surface. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. JP 2002-335004A discloses a device comprising an electron donor (paragraph 20) and acceptor structures wherein the electron acceptor structure containing at least one type of tubular nanostructure having at least one complexed or adsorbed pigment on its surface (paragraph 10-17 and 34).

3. A telephone call was made to Le-Nhung McLeland on 09/02/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
